Product: Perforated Metal

Pattern: Honeycomb

Honeycomb brings structure and softness together through a precise arrangement of interlocking hexagons. This versatile geometric pattern is ideal for contemporary facades, ceiling features, and eye-catching partitions.

This pattern can be customised for your project specification.

Customisation options:

- **Design scale:** Increase or decrease the pattern, depending on panel size
- **Hole size:** Enlarge or reduce the perforations to achieve the required open area percentage
- **Finishes:** Add a finish, from powder-coated colour to special coatings that increase longevity and weather resistance.
