Product: **Perforated Metal**

Pattern: **Rattan**

Rattan captures the look of handwoven cane through a rhythmic mix of circular and elongated perforations. The interplay of different hole sizes creates a light, breathable texture with timeless appeal.

Ideal for facades, partitions, shading elements, and ceiling features, Rattan brings warmth and refinement to both contemporary and classic spaces.

This pattern can be customised for your project specification.

Customisation options:

- **Design scale:** Increase or decrease the pattern, depending on panel size
- **Hole size:** Enlarge or reduce the perforations to achieve the required open area percentage
- **Finishes:** Add a finish, from powder-coated colour to special coatings that increase longevity and weather resistance.
