Product: **Perforated Metal**

Pattern: **Clover**

Clover evokes a sense of balance and harmony with its repeating cross-shaped perforations. The soft, rounded geometry creates a refined pattern that feels both modern and classic.

Offering strong visual rhythm, Clover is ideal for facades, balustrades, partitions, and screening elements, adding elegance and character to any architectural design.

This pattern can be customised for your project specification.

Customisation options:

- **Design scale:** Increase or decrease the pattern, depending on panel size
- **Hole size:** Enlarge or reduce the perforations to achieve the required open area percentage
- **Finishes:** Add a finish, from powder-coated colour to special coatings that increase longevity and weather resistance.
